

# MASTER ADVANCED TECHNIQUES IN SPINE SURGERY

This advanced spine surgery workshop is designed for **spine surgeons, orthopedic surgeons, neurosurgeons, fellows, and senior residents** seeking to enhance surgical precision & clinical outcomes in complex spinal procedures.

The workshop delivers **evidence-based, expert-led education** covering deformity correction, minimally invasive fusion techniques, trauma management, and navigation-assisted fixation, aligned with current international spine surgery standards.

By attending this workshop, participants will gain the ability to:

- Advanced Techniques in Scoliosis Spine Surgery
- OLIF: Principles and Surgical Techniques
- Comprehensive Management of Spinal Trauma
- Enhancing Accuracy in Occipito-Cervical Fixation with Navigation
